

My name is Wiktoria Brzezinska and I am a graduate of the Pharmaceutical and Cosmetic Industry programme.

Currently I work for a large pharmaceutical corporation, where I started working while still a student. Professor Michal Markuszewski's co-creation of the course was a jackpot. I am very satisfied with my work, and constantly developing and gaining new experience.

We have known Professor Markuszewski as a great lecturer. He constantly tried to get us interested in scientific research but also in the combination of the pharmaceutical industry and science.

I think he is a great candidate for the Rector of the Medical University of Gdansk. I believe he deserves our votes.

Colleagues, please vote for Professor Michal Markuszewski.
